

COPD KEY FACTS

- Chronic obstructive pulmonary disease (COPD) is a condition that makes it harder to breathe because of permanent damage to the lungs, which is usually caused by smoking
- COPD includes 2 diseases: **chronic bronchitis** and **emphysema**
- Symptoms of COPD include coughing up mucus, wheezing, and shortness of breath

This clinical trial is open to patients aged 40 to 80 years with a history of COPD and recent COPD exacerbation (within the last 12 months). Check with your doctor to find out if you qualify.

If you have COPD and are interested in taking part in a clinical trial, ask your doctor if a clinical trial may be right for you.

DO YOU HAVE
COPD?

Are you interested in taking part in a **CLINICAL RESEARCH STUDY** of new investigational medicines for COPD?

DO YOU HAVE

COPD?

Are you interested in taking part in a **CLINICAL RESEARCH STUDY** of new investigational medicines for COPD?

Taking Part in a CLINICAL TRIAL

- A clinical trial is a carefully controlled research study that examines the safety and efficacy (if it works) of an investigational medicine
- When taking part in this clinical trial, you may help researchers find better treatments for future patients with COPD
- During the trial, healthcare study staff will closely monitor your health
- You are free to stop taking part in the clinical trial at any time for any reason

Is This Trial RIGHT FOR YOU?

- This clinical trial is open to patients aged 40 to 80 years with a history of COPD and recent COPD exacerbation (within the last 12 months). Check with your doctor to find out if you qualify
- The clinical trial will examine the safety and efficacy of several investigational study medicines on the rate of COPD exacerbation in patients with moderate to very severe COPD
 - The investigational medicines used in this clinical trial include a long-acting beta-agonist and long-acting muscarinic antagonist (LABA/LAMA) combination therapy, a long-acting beta-agonist and long-acting muscarinic antagonist and inhaled corticosteroid (LABA/LAMA/ICS) combination therapy, and a long-acting beta-agonist and inhaled corticosteroid (LABA/ICS) combination therapy

Join the CLINICAL TRIAL

Talk with your healthcare provider to find out if you are eligible for the clinical trial. Before enrolling, your healthcare provider will go over all of the details of the clinical trial, including the risks and benefits.
